

About Game:

In this game you have to press key that appears on bubble. Score will update according to key you press. Bubble will disappear and your score will increase by 10 points if you press correct key, else decrease chances by 1 each type. There are particular numbers of chances you will get for each level. If chances become less 0 then GAME OVER.

Flow:

1. Initial Window is as shown in fig.1. As you can see there are levels like easy, medium and hard. The difficulty level increases according to levels.

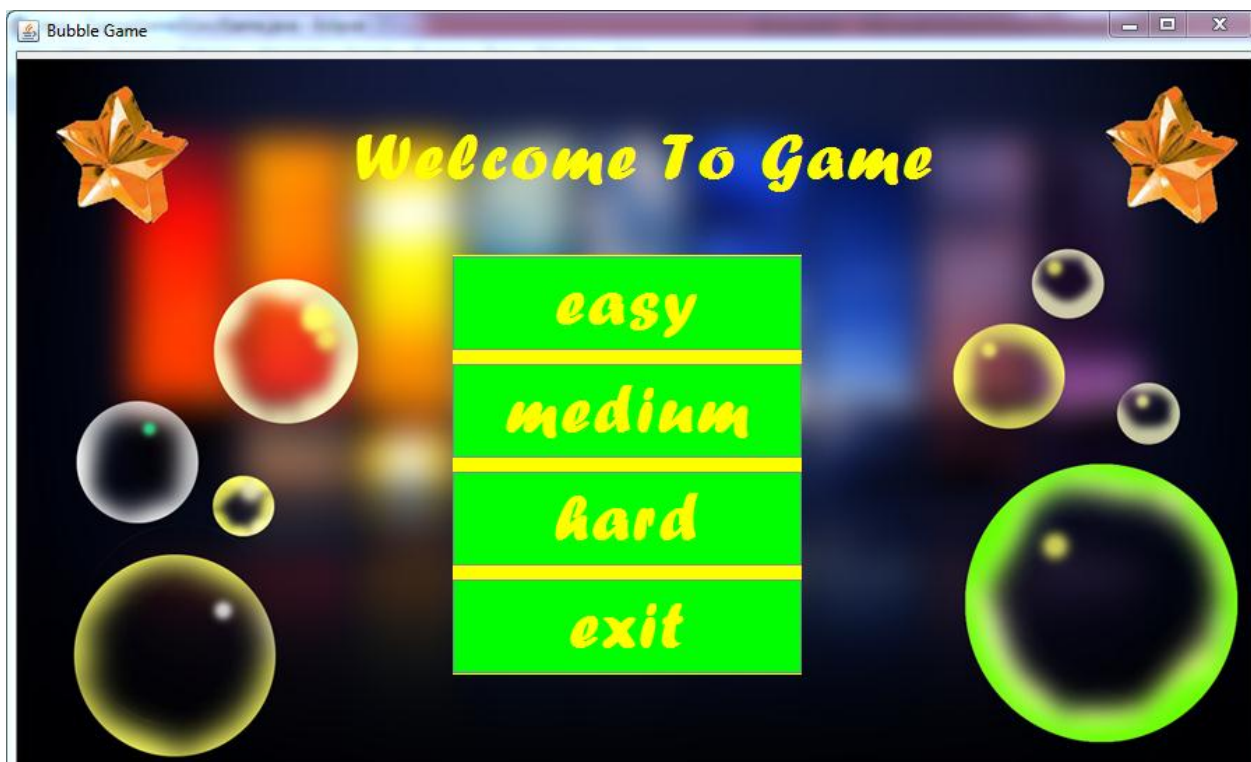

Fig. 1

2. After selecting easy, again you can play only for lower case, upper case, digits or combination of these letters as shown in Fig. 2.

4. If you score more than 100 then you can move to next level i.e. from easy to moderate level as shown in fig.4. Clicking on next stage, moderate level will start.

Fig. 4

5. In moderate level, rate of bubbles increases as compared to easy and additionally extra bubble having white color character on it is introduced after certain time limit. If you press that character then your score will become "ZERO". If you are unable to score more than 100 within chances then game over. You can also play again by selecting play again option as shown in fig 6 and move to next level i.e. to hard level by scoring more than 100.
